Managing Director Holden Says it is a Sure Go.

COMMENCE WORK SOON

TLINESS OF PRES. ROBERT D.

EVANS—MINING NEWS.

Managing Director A. F. Holden of the United States and Centennial-Eureka Mining companies returned from the east yesterday afternoon, after an absence of several months from Salt Lake.

Mr. Holden's arrival has been anxiously awaited here, a great many believing he would come prepared to make some important announcements relative to what is to take place over at the big Bingham bonanza, and something regarding the building of the proposed smelter at Bingham Junction.

The smelter is to be built, Mr. Holden states, but on account of the illness of President Robert D. Evans who underwent an operation for appendicitis about six weeks ago, nothing will be done towards the erection of the plant right away. The directors, at a previous meeting held in Boston, left the matter of smelter construction to Mr. Evans and Mr. Holden, with instructions to proceed with it. As soon as Mr. Evans thoroughly recuperates the work will be taken up and pushed to completion as rapidly as and severed of the pant graphs and Mr. Holden, with instructions to proceed with it. As soon as Mr. Evans thoroughly recuperates the work will be taken up and pushed to completion as rapidly as a complement of the pant right away. The directors, which consists of E. H. Airis, S. B. In Mining company, who held their and nual meeting yesterday afternoon, reelected the returing board of directors, which consists of E. H. Airis, S. B. In Miner, J. S. Lakin nucle of Salt Lake, and H. C. Southworth of Boston. The board afterward organized by the election of E. H. Airis, S. B. In Miner, J. S. Lakin and E. O. Lee of Salt Lake, and H. C. Southworth of Boston. The board afterward organized by the election of E. H. Airis, S. B. In Miner, J. S. Lakin nucle of Salt Lake, and H. C. Southworth of Boston. The board afterward of graph in graph in the lection of E. H. Airis, S. B. In Miner, J. S. Lakin nucle of Salt Lake, and H. C. Southworth of Boston. The board afterward of Googe E. Airis, sceretary.

The report of Se

In the meantime development will go on steadily at the mine, and every preparation made on that end to have things in shape to supply the new plant with a steady stream of ore whenever it is ready to go into commission.

Mr. Holden expresses himself as being well pleased with the condition of United States affairs, and there is nothing to hinder the carrying into effect of the plans outlined previous to the financial disaster that befell the company when the memorable crash in to the mancial disaster that befelf the company when the memorable crash in copper stocks came in Boston. Mr. Holden is especially well pleased with physical conditions at the Centennial-Eureka, which continues its daily extraction of 100 tons without a falter.

There is no movement in stocks whatever in the east at the present time, Mr. Holden says, those who have them can't sell out, and no one seems to want to bur. It is useless to attempt to present mining propositions to investors, no matter how meritorious they may be. The penaing presidential campaign is occupying everybody's attention, and until people settle in their own mind which way the election is going, or wait till the contest is over, Mr. Holden does not look for much activity in mining stocks, and only a limited demand for mining properties. But when the excitement and interest in the campaign subsides, matters will settle down to a solid basis, and business will be good again. There is no movement in stocks what-

group of seven patented claims on Scott hill, at the head of fron canyon and directly west of the Crescent mine, Park City, leaves for camp this morning with the necessary tools, etc., to resume work on that old-time property. A great amount of work has been done in the past, and much see carrying silver, lead and zinc has been opened up. On the eastern part of the group a shaft has been sunk 275 feet, and numerous other workings exist.

Mr. Kennelly now proposes to clean out the old shaft and start a new incline on the vein in the western portion of the ground, where he is confi-

free of zinc will be taken out from the turn-loose. He is so sure of what he has that he declares he will be in the market with a car of ore inside of sixty days. He intends to give the work his individual attention for several weekly.

DEXTER OFFICERS NAMED.

Net Profits of Mine Last Year Amounted to \$41,189.37.

The stockholders of the Dexter Gold Mining company, who held their an-

Superintendent Legg submitted a lengthy report showing the condition and amount of work done on the property since he took charge of the property last fall, and was in every way satisfactory to the shareholders.

Superintendent Legg's resignation has been accepted, and at the next meeting of the directors his successor will be named. Mr. Legg left the mine in charge of the foreman, and will arrive in the city today.

TRUST AND PRODUCERS.

Difficulties for the Combine in the Missouri Districts.

W. M. Wantland, or more familiarly known as "Wanty," has returned home from Joplin, Mo., where, during the present year he has been successful in making the acquisition of some valuable zinc and lead property.

Early in the year there were, Mr. Wantland says, about 300 mills in operation in the various districts, and all of them have been closed down but about twenty and he helicuses it is only

to present mining propositions to favestors, no matter how meritorious they may be. The pending presidential campaign is occupying everybody's attention, and until people settle in their own mind which way the election is going, or wait till the contest is over, Mr. Holden does not look for much activity in mining stocks, and only a limited demand for mining properties. But when the excitement and interest in the campaign subsides, matters will settle down to a solid basis, and business will be good again.

SEVIER MINE ALL BUT SOLD.

Mr. Lammersdorf Agrees to Most Reasonable Terms.

Splendid headway was made in negotiations for the Sevier mine of Gold Mountain, yesterday, and by this evening it is believed that the big deal outlined yesterday morning will have assumed a most businessike aspect.

When Mr. Lammersdorf came up Sunday night he stated he was here for business, and yesterday he convinced the representatives of the eastern combination now on the ground that he was ready to agree to terms which would involve the energetic working of his mine without any frilis

The local officials of the Ely Mining to the convenient of the may be been closed down but alout twenty, and he believes it is only a question of a short time till some of those will be in idleness.

This state of affairs was brought on by the fight between the smelter trust and the producers. The trust endeavored to get the producers. The trust endeavored to get the producers. The trust endeavored to sign a similar contract submitted fand acted to not a solid basis, and the producers. The trust candeavored to get the producers. The trust candeavored to get the producers. The trust endeavored to sign a duestion of a short time till some of those will be in idleness.

This state of affairs was brought on the fisher the producers. The trust candeavored to see the producers. The trust candeavored to see the producers. The trust candeavored to see the producers are the producers. The trust candeavored to see the producers are the producers. The trus

which would involve the energetic working of his mine without any frilis or unreasonable conditions.

With that understanding another conference will be held today, and if no unforseen hitch occurs, preliminary arrangements looking to the expenditure of \$20,000 during the next six months and the final transfer of the mine at the price named in the Long hond, namely, 70 cents a share, or \$155,000 for the mine, will have been made.

The straightforward business-like manner in which Mr. Lammeresdorf the manner in which Mr. Lammeresdorf the mine at the price named in the Long hond, namely, 70 cents a share of the company mining deals, that he was the subsect of many complimentary expressions from the purchasing side last evekin.

THE CHLORIDE POINT.

Changes in Mill Completed-Operations at the Overland.

Manager G. A. Duncan of the Over-

Manager G. A. Duncan of the Overland and Chloride Point mines is in from camp for a short stay.

Speaking of the Chloride Point Mr. Duncan stated yesterday that the new mill is in running order again after the brief shut-down, during which time several important changes were made in the equipment of the plant.

The ore is being crushed finer than formerly and as a result the extraction is more satisfactory than heretofore. The mine is looking good and altogether the property was never in better

Gisborn Holdings.

It was given out yesterday by a gentleman in a position to know that a deal has been practically closed whereby the Matt Gisborn holdings in the Geyser-Marjon, amounting to some 80.000 shares, will pass into the hands of ne astern crowd which is already eavily interested in the company. The gure at which the big block of stock (il be passed over is said to be 10 cents, share, or \$8,000.

Ixperts have been making an examtion of the mine and the producing robs shillities of not only that but lar mines elsewhere in the district been carefully compiled and the owners are understood to be dened to go in and make the Geyarion a winner.

Some all 50 cents, while Valeo call, and the bidding for it was quite active from 36 up to 37% cents a share. Call, and copper or which looks very rich. Two locations were most easily to support the serious property at Farmington, returning yesserday with samples prove up as well as expected, some lively work will be done this fall. William Dix, superintendent of the EI Amigo company's Park Valley property, came in from camp Sunday night on a deal has been driving during the past several months. He will return to camp is now that the hards of the big yen for which he has been driving during the past several months. He will return to camp is a day or two.

NOT YET SETTI-M

NOT YET SETTLED.

The Dalton & Lark Transaction May be Closed Today.

Negotiations by which Mr. P. T. Farnsworth will have associated with him a most powerful combination of eastern capital in the operation of the Dalton & Lark and Antelope properties in Bingham are well under way, and a favorable termination is expected to-day. Pending the final closing of the transaction particulars are unobtainable, though Mr. Farnsworth stopped long enough yesterday to say that the story printed by a contemporary yesterday was nothing more nor less than a jumbled mess of inaccuracies, gathered from he knew not where.

Strike in the Strike in the Strike in the story printed by a contemporary yesterday was nothing more nor less than a jumbled mess of inaccuracies, gathered from he knew not where.

Strike in the La Sals.

Sam N. King of Dewey, Grand counsail N. Aing of Dewey, Grand county, is in town and brings the report that a thirteen-foot vein of mineral has been encountered on the property owned by the Miners' Basin & Mineral Mountain Tunnel company, of which Dick Dillon is manager, operating in Miners' basin, La Sal district. Some of the ore Mr. King states trues 150 to owned by the Miners' Basin & Mineral Mountain Tunnel company, of which Dick Dillon is manager, operating in Miners' basin, La Sal district. Some of the ore, Mr. King states, runs \$170 to the ton, the predominating metals being silver and gold. He looks upon the discovery as the most important ever made in the district.

The La Sal district is the scene of considerable activity now, and every one is hopeful of the early extension of the Rio Grande Western into the camp.

Another Drop in Lead.

Lead, by the grace of the smelter trust, took another tumble yesterday, and the settling price for this week was fixed at \$4 per 100 pounds, or 10 cents lower than the ruling quotations of last week. The outlook for lead is everything but encouraging, and the opinion
